Subject: MLPAComments: Package Two

Fish and Game Department:

It has come to my attention that the Department has dropped plans to include Package Two (area from Breakwater Cove to Lover's Point) from the planned marine reserve area. I am quite troubled by this change and would ask the Department to reconsider and to include this area in the marine reserve. As many of you are aware, the fish population in this area has declined dramatically. It is also an area where many people come to experience diving and to see the natural beauty of the underwater sea life. Inclusion of this area in the marine reserve would increase the attractiveness of local diving which as you know is a major tourist attraction for the area. On the other hand, should fish populations in this area continue to decline, tourism would likely suffer.

Thank you for your consideration.
